

 **klöver**
the green chemistry...

India's Leading specialty Chemicals Manufacturer.

Industries We Serve

Klover Chem provides chemical solutions to various industries.

- **Power Plants**
- **Chemicals & Fertilizers**
- **Paper & Craft Industries**
- **Food & Beverages**
- **Pharmaceutical**
- **Distilleries & Breweries**
- **Malls & Hospitals**

- **Sugar Plants**
- **CETP'S**
- **Slaughter Houses**
- **Mining & Stone Crushers**
- **Poultaries & Aquaculture**
- **Petrochemicals**
- **Automobile Plants**

Our Purpose

to provide innovative and sustainable solutions to address the challenges of water quality and environmental conservation.

Our Vision

We aspire to be at the forefront of innovation in green chemistry, setting new standards for the development and production of water treatment solutions.

Our Mission

We aspire to be at the forefront of innovation in green chemistry, setting new standards for the development and production of water treatment solutions.

Solution We Provide

Cooling Water Treatment -

Our Cooling water treatment chemicals are specialized chemical formulations used to maintain the efficiency and cleanliness of cooling systems in industrial processes, HVAC (Heating, Ventilation, and Air Conditioning) systems, power plants, and various other applications. These chemicals are designed to prevent issues such as scale formation, corrosion, and biological fouling within cooling systems

- Scale Inhibitors
- Biocides & Bio-dispersants
- Corrosion Inhibitors
- Organic Dispersants
- Deposit Control Agents
- Cleaners & Passivators

Boiler Water Treatment -

Our Boiler water treatment chemicals are specialized chemical formulations used to treat the water in industrial boilers and steam generation systems. These chemicals are essential for maintaining the efficiency, safety, and longevity of boiler systems by preventing issues such as scale formation, corrosion, and the accumulation of contaminants.

- Scale Inhibitors
- Oxygen Scavengers
- Corrosion Inhibitors
- Sludge Conditioners
- Alkalinity Boosters
- Cleaners & Passivators
- Condensate Treatment

Closed Loop/Chilled Water Treatment -

Our Closed loop and chiller water treatment chemicals are specialized formulations used to maintain the cleanliness, efficiency, and performance of closed-loop heating and cooling systems, as well as chiller systems. These chemicals help prevent issues such as corrosion, scale formation, fouling, and microbiological growth within these systems.

- Scale Inhibitors
- Biocides & Bio-dispersants
- Corrosion Inhibitors
- Anti-freezing Agents
- Cleaners & Passivators

Reverse Osmosis Water Treatment -

Our Reverse osmosis (RO) treatment chemicals are specialized formulations used in reverse osmosis systems to enhance the performance, efficiency, and longevity of the RO membrane and associated equipment. These chemicals are designed to address specific challenges in the RO process, such as membrane fouling, scaling, microbial growth, and corrosion.

- RO Antiscalants
- Membrane Cleaners
- Biocides & Preservatives
- Alkalinity Boosters
- Food Grade Mineral Additives

Raw & Waste Water Treatment -

Our Raw and wastewater treatment chemicals are specialized formulations used in the treatment of both incoming raw water and wastewater to make them suitable for discharge into the environment or for reuse. These chemicals are essential for removing pollutants, contaminants, and impurities, ensuring compliance with environmental regulations, and protecting human health and the environment.

- Coagulants
- Flocculants
- Antifoaming Agents
- Color Removal Agents
- Odour Control

Swimming Pool Water Treatment -

Our Swimming pool water treatment chemicals are essential for maintaining the water quality, safety, and comfort of swimming pools. These chemicals are used to disinfect the water, balance pH levels, prevent algae growth, and remove impurities to ensure that the pool water remains clear, clean, and safe for swimmers.

- Chlorine
- Algaecides
- Clarifiers and Flocculants
- pH Adjusters
